

A

GSE190609 PM vs PT

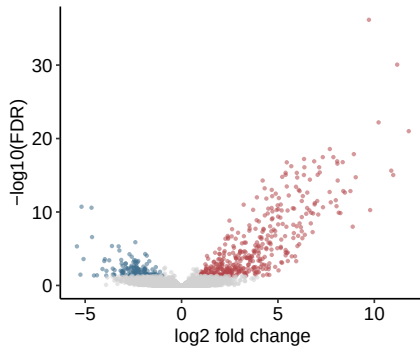

861 significant: 486 up / 375 down

B

GSE190609 LM vs PT

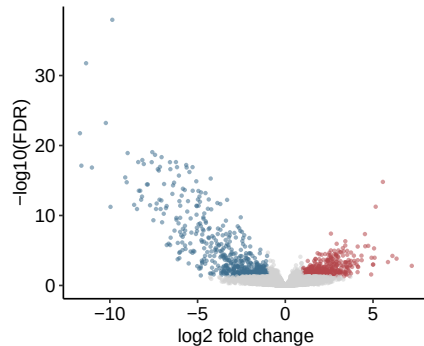

534 significant: 403 up / 131 down

C

GSE190609 PM vs LM

1,053 significant: 487 up / 566 down

Paired limma with patient blocking (design ~ organ + patient) in GSE190609 (113 samples, 12 patients).

Red, upregulated in the first-named group ($\text{FDR} < 0.05$ and $|\log_2\text{FC}| \geq 1$); blue, downregulated; grey, not significant.

Panel A labels the epithelial-mesenchymal-transition sanity-check genes (mesenchymal *SPARC*, *CDH2*, *FN1*, *FAP*, *COL3A1* up; epithelial *EPCAM*, *CDH1*, *MUC1* down).
